SADIQUE HASAN

Noida, Uttar Pradesh, India

| sadiquehasan03@gmail.com
LinkedIn | GitHub | Portfolio | LeetCode

TECHNICAL SKILLS

Languages, Databases & Messaging:	Java, JavaScript, SQL, PostgreSQL, Redis, Apache Kafka
Backend & Frameworks:	Spring Boot, Spring Security, Spring Data JPA, Spring Cloud, Resilience4j, JWT, REST APIs, Microservices
DevOps, Observability & Tools:	Docker, Kubernetes, Prometheus, Grafana, Zipkin, Apache JMeter, IntelliJ IDEA, Eclipse, VS Code, Git, GitHub, Maven, JUnit

WORK EXPERIENCE

Wipro **Feb 2026 – Present**

Graduate Engineer Trainee Noida, Uttar Pradesh

- Executed 500+ manual test cases across integration testing cycles to verify end-to-end functionality and identify defects before release.
- Wrote SQL queries to validate backend database records during testing.
- Log and track defects with detailed reproduction steps and severity levels, working closely with developers to verify fixes and re-test resolved issues.
- Perform sanity and regression testing after new builds and patches to ensure existing application workflows remain stable.

PROJECTS

Razorpay Clone | Java, Spring Boot, Apache Kafka, Redis, PostgreSQL, Kubernetes | GitHub **2026**

- Built a distributed payment processing system (7 microservices, Kubernetes-native) implementing idempotency, transactional outbox, and distributed locking patterns to guarantee exactly-once payment processing under concurrent load.
- Designed and validated a capacity plan for 10,000 TPS sustained throughput, including database sharding strategy, connection pooling, and multi-broker Kafka sizing, backed by real load-test evidence.
- Built and used a live Prometheus/Grafana observability stack to root-cause production-style performance investigations across five services, databases, Redis, and a message broker.

Fitness Tracker API | Java, Spring Boot, Spring Security, JWT, PostgreSQL, Docker | GitHub **2025**

- Built a RESTful backend service using Spring Boot for logging and querying user workouts and fitness activities.
- Implemented stateless authentication and role-based route protection using Spring Security and JSON Web Tokens (JWT).
- Structured request/response payloads using the DTO pattern and mapped relational schemas with Spring Data JPA and PostgreSQL.
- Containerized the service with Docker and deployed it on Render connected to a cloud-hosted Neon PostgreSQL database.

EDUCATION

United College of Engineering and Research **2021 – 2025**

Bachelor of Technology in Computer Science and Engineering Greater Noida, Uttar Pradesh

CERTIFICATIONS & ACHIEVEMENTS

- **LeetCode:** Solved 200+ data structures and algorithms problems.
- **AlgoPrep:** Completed Data Structures and Algorithms coursework.
- **CodingShuttle:** Certified in Spring Boot (Completed Spring Boot 0 to 100 Course).
